

## PRODUCT DATA SHEET

### CRL191 Series Combination Slimline

#### Features:

- Ultra Slim Design
- Integrated reflector
- ADR Compliant
- Surface Mount

#### Description:

Our new CRL191 series is a low profile slimline rear combination LED light, purposely designed for small trucks, utes, RV's, forklifts or mine bar applications. At just 191mm x 49mm this light can be mounted in smaller spaces without affecting rear signal compliance. It features a stop/tail/indicator/reverse and approved retro reflector. The CRL191 series offers a compact solution for many applications, easily mounted with a rating of IP67, the design may be slim but this series is a virtually indestructible polycarbonate lens.
