

PRODUCT DATA SHEET RAYZER HEAVY DUTY LED DRIVING LIGHTS

**WITH
RETAIL READY
DISPLAY PACKS**

Features:

- Precision LED beam technology for maximum illumination
- Available in 7" or 9" for immersive performance
- Heavy duty aluminium body with high resilience polycarbonate lens, made for heavy transport applications
- Integrated DRL, Indicator and Park Light
- Innovative 6 Way DT style wiring kit for easy installation of all functions.
- Certified ECE Compliance

Description:

Built to withstand even the toughest conditions, the Rayzer™ LED driving lights are encased in a heavy-duty aluminium body with a high-resilience polycarbonate lens and connected by a 6-way DT connector making them ideal for heavy transport applications. These lights are also fully integrated with ECE-certified park, DRL, and indicator lights, ensuring safety and compliance with industry standards. The optional innovative 6-way Dual DT-style plug-and-play driving light wiring kit, features 12-24V operation, smart high beam signal detection and allows easy installation of all functions. Enlighten your night-time driving experience with Rayzer™ LED driving lights, designed to truly slice the night.
