Features:

- State of the art design & optics to match modern vehicle styles
- Use individually or with 95mm and 122mm ZZ series lamps
- High reliability popular 55mm package
- Coloured or Clear lens options
- Emark & ADR Compliant

Description:

ZZ Series lamps use state of the art optics and design to match modern vehicle styling. Featuring a true modular system of 122mm, 95mm and 55mm lamps they can be used individually or inserted together to form a unique integrated combination lamp. Each diameter module is available for most functions front or rear including stop / rear position / indicator / reserve / DRL / park and fog making the applications almost limitless. The 95mm stop / rear position series feature high output LED's for high reliability and compliance for rear positions. Suited to OEM and commercial applications.
