

PRODUCT DATA SHEET TRAILER BREAKAWAY BATTERY KIT

Features:

- CTA rover approved for dual axle
- Audible low voltage alarm
- See through break away switch
- Special mounting brackets

Description:

The TV-BB5 Break Away Kit is a high-quality safety device that will engage electric trailer breaks if the trailer separates from the vehicle. This breakaway kit has patented and enhanced safety features over standard breakaway kits. Rover CTA certified for dual axle. This kit includes a special low-voltage audible alarm so if the battery is in a state of low voltage the user knows immediately. This kit also includes a high-quality breakaway switch with a unique cover designed to be seen-through so the contacts can be visually checked. The kit comes with custom mounting brackets, making the main unit very easy to mount to trailers. A 12V 5 amp/hour battery is included along with a breakaway switch and safety labels.
