

PRODUCT DATA SHEET ROTOLITE™ SERIES

Features:

- Wind powered – no internal power source required.
- Maintenance free – no batteries or oil to replace or recharge.
- Cone mounting – fits most common types of road cones.
- Double wide angle reflectors – high-visibility double faced reflectors.
- Heavy duty construction – high-impact ABS housing.

Description:

The Whitevision Rotolite® has been designed as a high visibility road safety warning device, which uses wind power to rotate three high performance reflector cups. In low light conditions, once a vehicle's headlamps hit the Rotolite™ a reflective flashing effect can be easily seen by the motorist. The unit requires no batteries for operation and is easily mounted to common road cones. Perfect for road works and related applications.
